WHICH INCLUDE 2 NIGHT DIVES
(BANGARAM, THINNAKARA, AGATTI,
KALPITTY)

AGATTI

India's smallest Union Territory Lakshadweep is an archipelago consisting of 36 islands with an area of 32 sq km. It is a uni-district Union Territory and inhabited islands. The islands have a total area of 32 sq km. The capital comprises of 12 atolls, three reefs, five submerged banks and are 220 to 440 km away from the coastal city lifestyle, which enhances the mystique of Lakshadweep. It is also the principal town of the Union Territory of all Islands of Kochi in Kerala, in the Arabian Sea. The natural landscapes, sandy beaches, abundance of flora and fauna and the absence of a rushed hectic life brings about peace and serenity. The name Lakshadweep in Malayalam and Sanskrit means 'a hundred thousand islands.'

Agatti is the glittering gateway to the Lakshadweep islands. Measuring roughly 6 to 7.6 km in length, this serene coral atoll is famous for having one of the most breath-taking shallow lagoons in the entire region. The island boasts long stretches of soft, white sandy beaches paired with warm, inviting tropical weather. The main Agatti Beach offers a peaceful escape where visitors can relax, sunbathe, or swim in calm, translucent waters. On the northern and southern tips, the slow pace of island life lets you unwind completely. For panoramic vistas, the local island lighthouse stands tall, offering a bird's-eye view of the surrounding coral reefs and the deep blue Arabian Sea. Agatti has a population of about 10,000, most of whom make a living by farming or fishing. The fishers catch valuable skipjack tuna with an ecofriendly pole-and-line method, which avoids bycatch. The community has informally created a 500-acre Locally Managed Marine Area, where fishing and other activities are restricted. Agatti is the only island in the archipelago equipped with an airport, with regular flights operating from Kochi and is the most convenient and main gateway to other Islands in Lakshadweep, apart from Ferries.
